ABOUT ME

Experienced in everything from **converting designs into functional pages** to setting up **complex applications in modern frameworks**.
Specialized in handling front-end development and dealing with UI and UX of anything that I work on. I am always interested to put my views on the look and feel of the product.
History of working effectively in **agile** environments. Disciplined and hardworking **team player**.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER (UI PLATFORM)

FORTO LOGISTICS SE & CO. KG. | BERLIN
MAY 2022 - PRESENT

Working as Senior front-end engineer in the UI Platform team.

Tools and technologies include: **React, Material UI, Nodejs, HTML, CSS, webpack, Storybook, Datadog, CircleCI, Jest, Cypress, Figma**

My role includes:

- **Collaborate closely with the design team** to spearhead the development of an elegant design system, empowering front-end engineers to create visually stunning user interfaces.
- **Elevate the quality of our front-end ecosystem** by enhancing and expanding the existing component library, resulting in a more efficient and consistent user experience.
- **Drive a user-centric approach by identifying pain points and challenges** in the front-end development process, leading to substantial improvements in the developer experience.
- **Foster a sense of community and knowledge sharing** within the Forto front-end community, staying at the forefront of industry trends and best practices.
- **Improve pipelines to reduce development time and costs**, ensuring efficient project delivery and resource utilization.
- **Maintain and validate our front-end stack**, leveraging the latest technologies and frameworks to keep our applications at the cutting edge of innovation.
- **Facilitate seamless cross-team collaboration** by effectively communicating and coordinating efforts between various departments, ensuring project success and alignment with organizational goals.
- **Uphold the highest coding standards and best practices**, guaranteeing that our front-end codebase remained clean, maintainable, and scalable.
- **Empower cross-functional teams to proactively monitor and improve code quality** by enabling the creation of operational metrics, including code coverage, identification of deviations in code, and tracking outdated library usage, thereby enhancing overall codebase health and reliability.

Notable achievements:

- Helped build a token based design system with seamless integrations between github and Figma where designers can push changes in color and typography from Figma directly into our components library in github without any manual coding needed from developers.
- Generated metrics for things like code coverage and deviations in design system which is automatically pushed to Datadog as part of the deploy pipeline which will help teams to track the quality of code over time
- Enabled teams to be able to gradually migrate from Material UI v4 to v5 by setting up the front-end apps to run both version at the same time. This enabled teams to parallelly migrate without having to stop feature development
- Significant contribution to our components library (React, MUI, Storybook)
- Made significant improvements to our build pipelines in CircleCI

SENIOR PROGRAMMER

ONE.COM | DUBAI
MAY 2016 - APR 2022

Worked on front-end and backend development of Webshop
(<https://www.one.com/en/webshop>)

Technologies included: **React, Knockout.js, Javascript, HTML5, CSS, NodeJS, PostgreSQL**

My role included:

- Developing pixel perfect UI from given design and making it functional in React
- Converting existing Knockout.js code to React.
- Writing handlers in backend which is in Node.js and familiar with writing queries in PostgreSQL.
- Have worked on integrating payments through Credit card, iDEAL and Giropay using Stripe
- Acting as the communicator between my team of 5 developers with me in Dubai and the Project Manager in Copenhagen.
- Responsible for keeping an eye on the progress of the Sprint and making sure that the product manager is informed about any changes in it.
- Follow scrum methodology and Agile Software Development strategy.

SENIOR PROGRAMMER

NEXSALES CORPORATION | MUMBAI
NOV 2014 - APR 2016

Worked on front-end development of a web app VoiceReach used by BPO for reaching out to prospects for marketing.
It was a single page web application written in AngularJS 1.3

Technologies include: **HTML5, CSS, Javascript, AngularJS 1.3, Bootstrap, NodeJS**

My role included:

- Getting involved in feature discussions and giving inputs on the UI/UX.
- Developing in AngularJS which includes creating HTML templates, styling CSS, writing code for angular controller, directive and services.
- Integrating external angular directives and using it.
- Follow scrum methodology and Agile Software Development strategy.

SOFTWARE ENGINEERING SR. ANALYST

ACCENTURE | MUMBAI
FEB 2014 - NOV 2014

Worked on front-end development of a retail company client. Work included making templates for given psds and making it functional. Making sure the page is responsive on all devices.

Technologies include: **HTML5, Javascript, jQuery, Sass, Bootstrap, Handlebars, Backbone.js**

SENIOR PROGRAMMER

ZEUS SYSTEMS PVT. LTD. | MUMBAI
JUL 2009 - JAN 2014

Worked on many e-learning products to help kids of different age groups learn Maths and Science.

Technologies include: **HTML5, Javascript, jQuery, Backbone.js, ActionScript 3, Flash**
