ABOUT ME

Experienced in everything from converting designs into functional pages to setting up complex applications in modern frameworks.
Specialized in handling front-end development and dealing with UI and UX of anything that I work on. I am always interested to put my views on the look and feel of the product.
History of working effectively in agile environments. Disciplined and hardworking team player.

WORK EXPERIENCE

SENIOR PROGRAMMER
ONE.COM | DUBAI
MAY 2016 - PRESENT

Working on front-end and backend development of Webshop (https://www.one.com/en/webshop)
Front-end is implemented using Knockout.js , backend is in Node.js and database in PostgreSQL.
We are now gradually re-writing this in React .

My role includes:

- Developing pixel perfect UI from given design and making it functional in React
- Fixing bugs in existing Knockout.js code.
- Converting Knockout.js code to React.
- Writing handlers in backend which is in Node.js and familiar with writing queries in PostgreSQL.
- Have worked on integrating payments through Credit card, iDEAL and Giropay using Stripe
- Acting as the communicator between my team of 5 developers with me in Dubai and the Project Manager in Copenhagen.
- Responsible for keeping an eye on the progress of the Sprint and making sure that the product manager is informed about any changes in it.
- Follow scrum methodology and Agile Software Development strategy.

Technologies include: React, Knockout.js, Javascript, HTML5, CSS, NodeJS, PostgreSQL

SENIOR PROGRAMMER
NEXSALES CORPORATION | MUMBAI
NOV 2014 - APR 2016

Worked on front-end development of a web app VoiceReach used by BPO for reaching out to prospects for marketing.
It was a single page web application written in AngularJS 1.3

My role included:

- Getting involved in feature discussions and giving inputs on the UI/UX.
- Developing in AngularJS which includes creating HTML templates, styling CSS, writing code for angular controller, directive and services.
- Integrating external angular directives and using it.
- Follow scrum methodology and Agile Software Development strategy.

Technologies include: HTML5, CSS, Javascript, AngularJS 1.3, Bootstrap, NodeJS

SOFTWARE ENGINEERING SR. ANALYST
ACCENTURE | MUMBAI
FEB 2014 - NOV 2014

Worked on front-end development of a retail company client. Work included making templates for given psds and making it functional. Making sure the page is responsive on all devices.

Technologies include: HTML5, Javascript, jQuery, Sass, Bootstrap, Handlebars, Backbone.js

SENIOR PROGRAMMER
ZEUS SYSTEMS PVT. LTD. | MUMBAI
JUL 2009 - JAN 2014

Worked on many e-learning products to help kids of different age groups learn Maths and Science.

Technologies include: HTML5, Javascript, jQuery, Backbone.js, ActionScript 3, Flash
